**Become Certified with Micro Point Solutions:
Glueless “Extensions” to Conceal Thinning Hair**

M I C R O P O I N T

S O L U T I O N S

Micro Point Solutions is a service for clients with thinning hair or hair that lacks fullness and volume. Or for clients who have found standard extensions too damaging; and for the top of the head where extensions cannot go. Micro Point Links instantly add more volume to your clients existing hair – transforming their hair in just one visit.

If your client is thinning around the crown or parietal ridge, then Micro Point Links will help restore volume and fullness to that area. Each Link features 2, 4, or 6 individual “Cyberhairs®,” that are looped and knotted around an individual hair strand. Cyberhairs® are created fibers that are three times lighter than human hair, so they don’t add stress to the healthy hair strand.
